

1. **TurbineID**: Unique identifier for each wind turbine.
2. **WindSpeed (m/s)**: Speed of the wind.
3. **RotorSpeed (RPM)**: Speed at which the rotor is spinning.
4. **BladeAngle (degrees)**: Angle of the blades.
5. **GearboxTemperature (°C)**: Temperature of the gearbox.
6. **GeneratorTemperature (°C)**: Temperature of the generator.
7. **Vibration (mm/s)**: Vibration level detected in the turbine.
8. **PowerOutput (kW)**: Amount of power generated.
9. **Humidity (%)**: Relative humidity in the air.
10. **AmbientTemperature (°C)**: Outside temperature.
11. **Failure (0/1)**: Whether the turbine experienced a failure (0 = No, 1 = Yes).
12. **TimeSinceLastMaintenance (days)**: Number of days since the last maintenance check.
13. **FaultType**: Type of failure (e.g., Gearbox, Generator, Blades, Electrical), if a failure occurred.
